Full-stack developer specialized in SAP BTP with proven experience designing and delivering scalable enterprise applications for S/4HANA Public and Private Cloud. Strong expertise in CAP, RAP, SAP Fiori, and Integration Suite, combined with a background in AI-driven solutions and published ML research. Passionate about building high-quality, scalable systems and solving complex business problems through modern technologies.

PROFESSIONAL EXPERIENCE

Infocenter SAP Gold Partner

SAP BTP Full-Stack Developer

Asunción, Paraguay

January 2025–Present

- Acted as technical lead for a team of 5 developers, making architecture decisions, gathering requirements, and managing delivery timelines.
- Designed, developed, and deployed 25+ **Fiori** apps, **CAP** services, and **RAP** extensions using **OData services**, **CDS Views**, **XSUAA**, and **Cloud Foundry**, improving operational efficiency and reducing manual processes.
- Designed and implemented iFlows in **Integration Suite** to synchronize external systems (Redmine) with S/4HANA using REST APIs, handling data transformation, error handling, and authentication.
- Leveraged **SAP HANA Cloud** and **Event Mesh** to design scalable, event-driven architectures for enterprise applications.
- Actively contributed to 5+ **S/4HANA** Public and Private Cloud implementation projects.
- Mentored 3 junior developers in **SAP BTP** development, accelerating team productivity.
- Integrated **SAP Joule** capabilities into S/4HANA and SuccessFactors workflows to enhance user productivity through AI-assisted interactions.
- Developed and customized **Adobe Forms** using **SAP Adobe LiveCycle** integrated with S/4HANA, enabling dynamic generation of customized business documents such as service orders and checks.

Tech Stack: SAP BTP, SAP Fiori, CAP, RAP, OData, CDS Views, XSUAA, Cloud Foundry, Node.js, SAP HANA Cloud, Event Mesh, Integration Suite, Destinations, SAP Business Application Studio, Adobe Forms, AI/Joule.

Shuangho Hospital

Research Assistant

Taipei, Taiwan

August 2024–January 2025

- Contributed to the development of a **Vision Transformer** model that identifies bacterial pathogens from high-resolution microscopy images of cultures, achieving **98% accuracy** and improving reliability in automated pathogen detection.
- Applied image augmentation techniques to improve model generalization on limited medical datasets.
- Co-authored a research paper published in **Computer Methods and Programs in Biomedicine** (Elsevier):
"Alignment-free Bacterial Pathogen Identification Using Vision Transformer and Image Augmentation Techniques in High-Resolution Microscopy."

Tech Stack: Python, PyTorch, Computer Vision, Deep Learning and Image Processing.

PERSONAL PROJECTS

Triforce Gym: A mobile app for gym management with 150+ active users. The owner can manage memberships, payments, attendance, and class schedules. Members can start workouts, track their stats, and manage their profile. Built with a real-time backend using Supabase and PostgreSQL.

Tech Stack: Expo, React Native, Supabase, PostgreSQL and TypeScript.

Joyería Fernando: A full e-commerce site for a jewelry shop with 2-3k monthly visitors. Customers can browse the catalog, filter by category, add pieces to their cart, and complete their purchase with direct Pagopar payment integration. SEO-optimized with server-side rendering.

Tech Stack: Next.js, NestJS, PostgreSQL, React, Tailwind CSS, TypeScript and Pagopar.

Rastrocero: A landing page for Rastrocero, a climate intelligence platform that turns organizational data into structured, traceable carbon footprint metrics. The site explains how the platform works across scopes 1, 2, and 3, and guides potential clients toward requesting a demo.

Tech Stack: React, CSS and JavaScript.

EDUCATION

UNIVERSIDAD POLITÉCNICA TAIWÁN-PARAGUAY

B.S. in Computer Science Engineering

Honors: High GPA Distinction

Asunción, Paraguay

Feb 2021 – Dec 2024

NATIONAL TAIWAN UNIVERSITY OF SCIENCE AND TECHNOLOGY

Exchange Program in Computer Science Engineering

Taipei, Taiwan

Feb 2023 – Dec 2024

CERTIFICATIONS

- SAP Certified Associate — Fiori Application Developer
- SAP Certified Associate — Backend Developer (CAP)
- SAP Certified Associate — Generative AI Developer
- TOEFL — International English Certification

ADDITIONAL SKILLS

Programming languages: Advanced: JavaScript/TypeScript, SQL, Python; Intermediate: ABAP.

SAP Technologies: Advanced: SAP BTP, SAP Fiori, CAP, RAP, OData services, CDS Views, XSUAA, Cloud Foundry, Destinations, SAP Business Application Studio (BAS); Intermediate: Integration Suite, Adobe Forms, AI/Joule.

Frameworks & Tools: Advanced: React, Next.js, Node.js, React Native, Expo; Intermediate: NestJS, PyTorch.

Databases: SAP HANA Cloud, PostgreSQL, Supabase.

AI/ML: Computer Vision, Deep Learning, Machine Learning, Image Processing.

Languages: English: Advanced C1 (TOEFL Certified); Spanish: Native.
